About the Project

Project ID: 101091146

Project Duration: 01.01.2023.– 01.12.2024

The project addresses the research component through practical methods and education of rural young people vulnerable to energy poverty in their households, supporting the energy transition in rural areas located in Western Balkan. The project is foreseen to last 24 months, and it will involve 5 partners (3 (three) partners from Western Balkan (WB) and 2 (two) partners from EU).

The main goal of the Project GETA is to develop tools and new forms of training schemes to empower youth workers to become energy advisors and train rural youth to push for a smart energy transition in rural areas.

Final Conference in Sarajevo, October 2024

On October 29th, 2024, GETA Project Partners met each other in the Youth House in Sarajevo, for the Final Meeting. During the meeting, partners reflected on the activities completed during the project duration, discussed the possibilities for further promotion of the energy poverty and energy transition issues among youth and possibilities of stronger engagement of youth in each partner country in this field. The Sustainability Plan on how to translate the intent of ensuring the long-term resilience of GETA Project results, impact and relevance through viable actions and strategies to be carried out individually and co-ordinately by partners in a mutually agreed frame.

GETA Final Conference in Hadzici, Sarajevo, October 2024

On October 30th, 2024, project partners hosted the Final Conference of the GETA Project in Municipality Hadzici, marking a significant step forward in promoting sustainable energy practices. Attendees engaged in insightful discussions on the fundamentals of energy transition, effective solutions for tackling energy poverty, and the importance of empowering rural communities. One of the key highlights was the presentation of research findings specifically focused on the Municipality of Hadzici, providing a tailored perspective on local energy challenges and opportunities. Additionally, the event celebrated the launch of the GETA E-learning platform, a vital resource designed to equip communities with the knowledge and skills necessary for a sustainable future. The Conference brought together partners, stakeholders, and community members, all contributing to a meaningful dialogue around sustainable energy solutions. This event represents the culmination of collaborative efforts aimed at creating impactful change in rural areas.
